1. **Email**

You are in charge of official student communications at a technical university and are recognized for maintaining a high level of academic professionalism. Draft a formal and well-structured email announcing a one-day skill development workshop titled “Fundamentals of Cybersecurity and Introduction to Ethical Hacking.”

The email should be addressed to Undergraduate Engineering students and should clearly highlight the academic importance of the workshop in today’s technology-driven world. Emphasize how it will enhance students’ understanding of security threats and the measures used to protect modern systems.

Incorporate the following details smoothly within paragraphs rather than listing them as bullet points: the objective of the workshop and key skills to be gained, schedule details such as date, duration, and mode of delivery, core topics including network security fundamentals, ethical hacking concepts, and case-based discussions, registration procedure with deadlines if any, and contact details for queries.

Ensure the tone remains formal, clear, and encouraging, appropriate for an academic setting. Keep the content concise, logically organized, and free from unnecessary promotional language. Limit the email to approximately 180–200 words.

Email:

Dear Undergraduate Engineering Students,

The University is pleased to announce a one-day skill development workshop titled "Fundamentals of Cybersecurity and Introduction to Ethical Hacking," aimed at strengthening your understanding of security practices in today's technology-driven environment. As digital systems continue to expand across industries, foundational knowledge of cybersecurity has become essential for every engineering student.

This workshop is designed to introduce core principles of network security and ethical hacking while developing your ability to identify common vulnerabilities and understand methods used to safeguard modern systems. Through guided sessions and case-based discussions, participants will gain practical insights into real-world security challenges.

The workshop is scheduled to be conducted on [insert date] as a full-day session from 9:30 AM to 4:30 PM and will be delivered in [online/offline] mode. Students interested in participating are required to complete the registration process via [insert registration link] on or before [insert deadline].

For any queries or further clarification, you may contact the organizing committee at [insert contact email/phone number].

Your active participation is encouraged as part of your academic and professional development.

Sincerely,
Academic Coordination Cell
Office of Academic Affairs
Rv University

2. **Image**

Prompt:

Produce a professional, photorealistic academic poster for a university-level technical workshop hosted by RV University. The design should use a primarily white background complemented by very soft, understated light-blue accents to achieve a refined and institutional aesthetic. Avoid dark shades of blue, neon colors, gradients, or overly futuristic styling. The overall composition must remain simple, formal, and suitable for official university notice boards and digital sharing.

Use a realistic classroom or innovation lab environment as the central visual element. Depict engineering students working on laptops while a faculty member delivers a presentation on a digital screen in a contemporary classroom. The setting should appear natural, evenly lit, and authentic, closely resembling a real academic space. Do not include holographic visuals, glowing UI elements, sci-fi themes, or exaggerated artificial intelligence imagery.

Place the RV University logo prominently at the top of the poster, using the provided PNG file exactly as it is. Ensure the logo is not modified, recolored, stylized, or distorted in any form. Maintain its original proportions and provide adequate spacing from the edges for clarity.

Position the workshop title near the top center in clear, modern, academic-style typography: “Workshop : Generative AI and Future Technologies.” In the lower section of the poster, include the event details in a neat and well-structured format: Date: 7th October 2024, Time: 9:00 AM – 7:00 PM, Venue: Homi J Baba Hall 405. Ensure the text is clearly legible, properly aligned, and balanced with sufficient white space.

Render the final poster in high resolution with crisp details, natural lighting, clean borders, and a professional layout. The end result should resemble an authentic university workshop poster—realistic, minimal, and institutionally appropriate, without any stylized or illustrative appearance.

Date: 7th October 2024
Time: 9:00 AM – 7:00 PM
Venue: Homi J Baba Hall 405

3. **Video**

Prompt for 30 second video:

Create a 30-second **visual-only promotional video** for a university-level technical workshop at RV University titled **"Fundamentals of Generative AI."** The video should not include any voiceover or narration—only on-screen text, realistic footage, and soft background music. Maintain a **formal, minimal, and professional tone** appropriate for official university communication.

Use **photorealistic, stock-style visuals** set in a modern university classroom or innovation lab. Show engineering students working on laptops, collaborating in small groups, and paying attention to an instructor presenting on a digital screen. Avoid any futuristic elements such as holograms, glowing interfaces, AI avatars, or sci-fi effects—everything should feel natural and realistic.

Scene 1 (0–5 seconds):
Display the title **"Generative AI and Future Technologies"** prominently at the center. Include the RV University logo in either the top-left or top-right corner, keeping it small and subtle. Use either a clean white background or a bright classroom setting with light blue text accents.

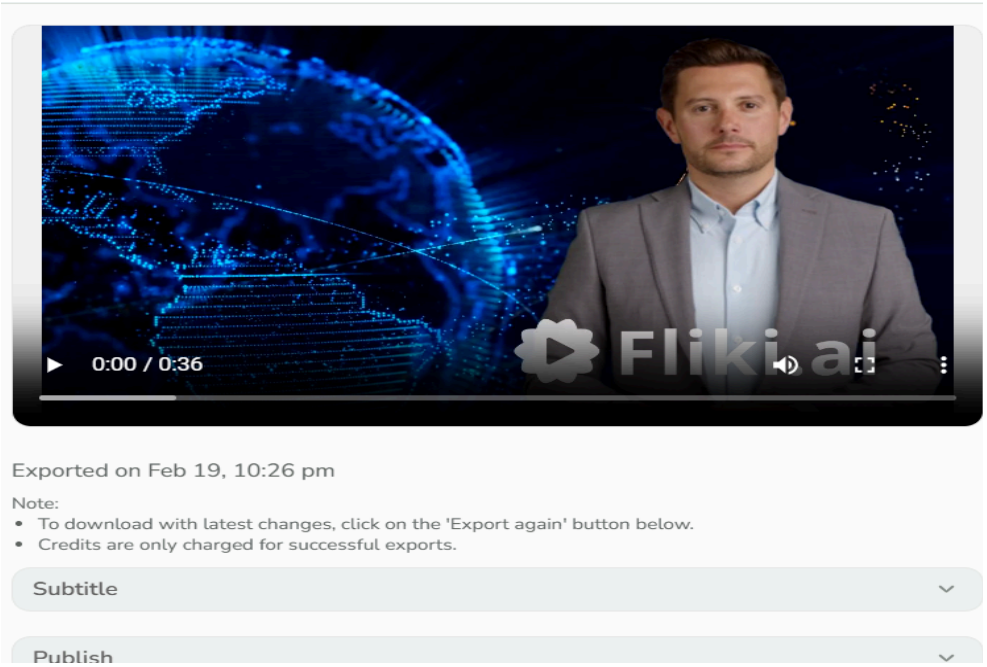
Scene 2 (5–20 seconds):
Show a sequence of classroom interactions—students learning, collaborating, and working on laptops. Keep the RV University logo fixed in the same corner throughout. Use minimal text overlays such as **"University Technical Workshop"** or **"Hands-on Learning Environment"** where appropriate.

Scene 3 (20–30 seconds):
Present the event details clearly using on-screen text:

- **Date:** 7 October 2024
- **Time:** 8:00 AM – 3:00 PM

- **Venue:** Homi J Baba Hall 405
  Maintain the logo placement and use a clean white background with subtle light blue accents.

Select **soft, neutral instrumental music** (corporate or ambient style). Ensure smooth transitions, clear typography, and a polished, high-quality finish suitable for official RV University digital promotion.



1 Minute Video:

Prompt:
Create a **60–90 second event announcement video** for RV University featuring a professional voiceover.

This is strictly an **event-focused video**, not a university profile.
Do **not** include descriptions of RV University's vision, rankings, academic strength, research output, or institutional philosophy.

Avoid generic promotional phrases such as “pinnacle,” “groundbreaking,” “redefining the future,” or “intellectual curiosity.”

The video should promote a specific technical workshop titled:
“Fundamentals Of Generative AI.”

The narration must be:
• factual
• concise
• focused on the event
• formal and academic in tone
• appropriate for official university communication

The voiceover should cover only:
• the technical workshop
• student participation
• hands-on learning sessions
• classroom and lab-based activities
• faculty-led instruction
• practical exposure to emerging technologies

Do not include abstract ideas, motivational lines, or storytelling elements.

Visual Requirements:
Use realistic, stock-style footage of:
• modern university classrooms and innovation labs
• engineering students working on laptops
• small group discussions
• instructor-led teaching sessions
• coding and presentations on digital screens

All visuals must feel natural and grounded in a real academic setting. Avoid any futuristic visuals, AI avatars, holograms, or sci-fi elements.

Branding (Mandatory):

• RV University logo must be present in every frame

• Position: top-right corner only

• Small, fixed, and unobtrusive

• No animation, color changes, or transitions applied to the logo

On-Screen Text (Must Include):

• Workshop title

• Date: **7 October 2024**

• Time: **8:00 AM – 3:00 PM**

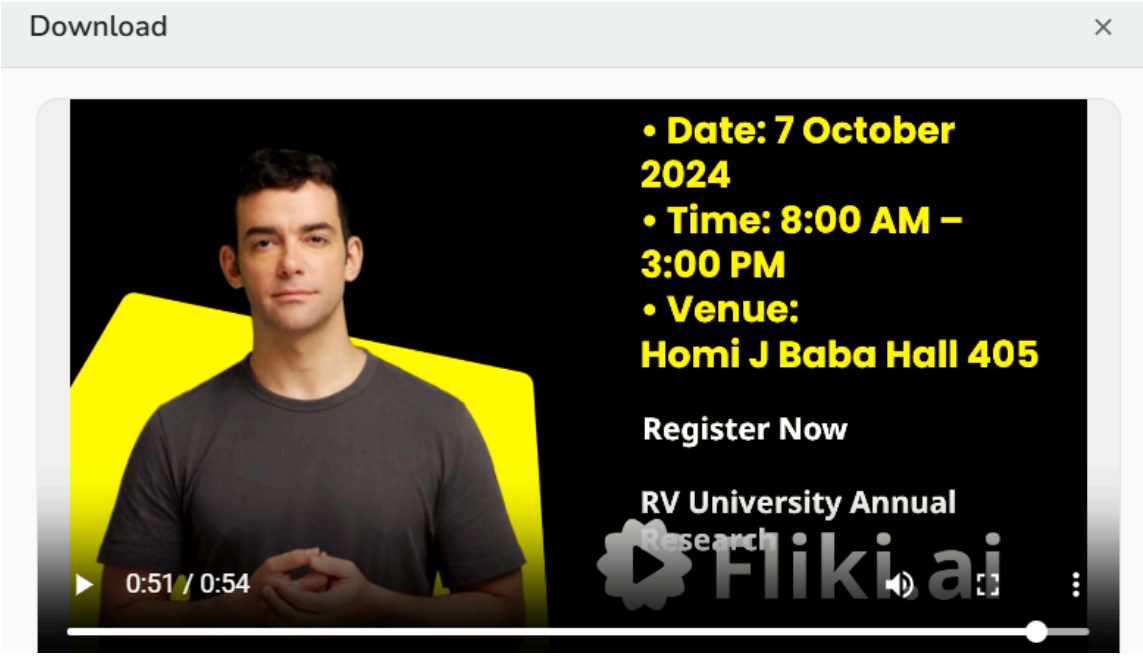
• Venue: **Homi J Baba Hall 405**

Audio:

• Single professional English voiceover

• Calm delivery, medium pace

• Neutral academic tone

• Soft instrumental background music


The final output should feel like a **formal university workshop announcement**, not a promotional or branding video.
